

Effective today March 20, 2020,

Safety of Employee and Community,

Applied Chemical Technology, Inc. is committed to the health and safety of its employees, clients, vendors and the public. As such we are actively monitoring the COVID 19 situation; we are talking with our medical experts, manufacturing associations and government leaders to take steps to protect our employees, clients, vendors and the communities to keep everyone as safe as possible. We understand the importance of supporting our clients to help ensure that their future continues and ours. We will remain open as long as it is prudent to do so following the guidelines as we understand them. We appreciate everyone's help and understanding in these unusual times. We are asking everyone that if you are sick or have been around anyone that has been affected by the virus, please refrain and postpone from coming to our operations. When and where possible use electronic media etc. to conduct business and prearrange all face to face meetings ahead of time. Together we can help keep our communities safe during these unsettling and difficult times.

Thank you,

Curtis Lewey

President

Applied Chemical Technology, Inc.
